Profile

Robotics & AI student with experience in ML and RL. Skilled in Python and C++ programming, with a strong interest in psychology and neurology.

Experience

Robotics Team Member , NeuroTUM	Apr. 2026 – Present
- Developed a ROS 2-based package for moving chess pieces using a Neura MAiRA robot.	
Video Production Lead , BLISS	Sept. 2025 – Present
- Recording, editing and managing videos for the community's YouTube channel.	
Research Assistant , Science of Intelligence	Apr. 2025 – Present
- Creating Unity environments for research experiments.	
Student Assistant , Technische Universität Berlin	Oct. 2023 – Apr. 2025
- Tutor in the courses: Computability and Complexity, and Scientific Computing.	
Coach , TUMO	Aug. 2022 – May 2024
- Mentoring teenagers in technologies like robotics, and game development.	

Publications

Mobile Device Fingerprinting - Bachelor Thesis	Apr. 2025
- Bring together a cohesive understanding of the field.	
- Conducted sensor data collection and evaluated a wide range of classifier models.	
- Proposed various possible countermeasures.	
- Full paper at MSWiM 2025 Barcelona.	

Projects

Tool Use - Robotic Manipulation	Feb. 2026
- Developed a RL pipeline for robotic tool design and placement.	
Smart Planting - Home Automation	July 2025
- Programmed an ESP32 microcontroller to automate plant watering.	
Gaming Agent - Symbolic AI	July 2024
- Implemented a heuristic-based agent for playing a multiplayer board game.	

Education

Oct. 2019 - Mar. 2026	B.Sc. Computer Science	TU Berlin
Apr. 2026 -	M.Sc. Robotics, Cognition, Intelligence	TU München

Additional Information

- **Awards:** Andrés Bello Award for highest regional score in state exams.
- **Volunteering:** Worked on organic, permaculture-focused farms.
- **Languages:** Spanish (Native), English (Fluent), German (Fluent), French (Basic).
